

The Bovis Energy Scale

Thanks to a French researcher in the 1930's by the name of Antoine Bovis, we have a means to measure the "life force" or "natural earth energy" present in water, plants, rock formations and the like.

Ranging from zero to infinity, those trained in the required intuitive methods can assign a "Bovis" value to whatever they measure. For example, human beings show a reading on the Bovis scale of 6,500. Scientific research has correlated the clockwise or right spin of atoms and molecules with a Bovis reading below 6,500 is neutral for human life (i.e. life-depleting), and anything registering above 6,500 is essentially energy invigorating or enhancing to us. So, a counter clockwise or left spin correlates with a reading above 6,500 (i.e. life-enhancing).

Besides mismanagement of the environment, readings below 6,500 are the effect of underground streams, geological faults, and Earth's magnetic grids. Several of Earth's energy vortices exceed 2,000,000 Bovis. **"Himalayan Goji Juice" shows a reading of 355,000... the highest reading that many health professionals have reported ever receiving.** A truly amazing product!

Some Recorded Bovis Energy Ratings:

Noni Juice	17,000
Sea Silver	24,000
Xango	53,000
Limu Plus	54,000
Himalayan Goji Juice	355,000

The Hertz Energy Scale

Another energy unit... named for the German physicist Heinrich Rudolf Hertz (1857-1894), who proved in 1887 that energy is transmitted through a vacuum by electromagnetic waves.

Some Recorded Hertz Energy Ratings:

Noni Juice	0 – 500
Sea Silver	2,000
Limu Plus	2,000
Xango	2,300
Himalayan Goji Juice	6,000

In a world where science is recognizing "energy medicine" more and more and its' crucial role in releasing healing properties, these stats are a powerful confirmation of Himalayan Goji Juice playing an integral part (of the whole:-) in providing cutting-edge wellness products.

In Body, Mind and Spirit... to YOUR Health and Happiness,
Pam Richard, N.D.
